

Secondary Production Technicians (Initially Temporary)

Location: York, UK

Abingdon Health is a rapid diagnostics company based just outside York, focusing on the [development, manufacture and commercialisation of immunoassays and reader systems](#). Operating in the in the fields of healthcare, veterinary diagnostics and agriculture, Abingdon Health develop and manufacture their own products as well as offering an assay development and manufacturing service to contract customers.

Situated on an easily accessible and well-equipped Innovation Campus, Abingdon Health is GMP compliant and certified to the quality standards ISO 13485:2016 and ISO 9001:2015.

As part of ongoing growth within the company, this position is one of a number that have been identified to join our expanding York facility.

Job summary:

- As part of a team support the various manual and automated production assembly activities.
- Ensure that all relevant procedures are followed and compliance is maintained in line with current versions of ISO: 9001 and ISO: 13485 and Abingdon Health Quality management System.

Primary Duties and responsibilities:

- Manual and automated assembly of lateral flow devices and subsequent finished kit packaging
- Adhere to all aspects of the Company Quality System in the completion of your duties.
- Responsible for adhering with company policies, goals and procedures
- Ensure a high standard of occupational health and safety in the workplace (all relevant H&S and COSHH requirements must be met), and maintain good manufacturing practices and housekeeping.
- Be part of an effective team through training, coaching and performance management in order to improve business performance as well as maintaining good industrial relations and ensuring the team meets its principal accountabilities.
- Maintain required standards of control for materials and components used in production processes.
- Utilise all equipment correctly, efficiently and adhere to all operating procedures.
- Assist in other areas of the company when required where skills/experience can be utilised.

The candidate would ideally have experience in the following areas:

Essential

- A flexible approach to working in a relatively new but rapidly expanding organisation
- The ability to work effectively within a close team environment
- Attention to quality detail in a repetitive process

Desirable

- Production assembly experience
- Experience in a regulated production environment
- Knowledge/experience of GMP working practices
