

R&D Scientist
Location: Birmingham, UK

We are a fast growing, innovative York-based company focused on developing point of care diagnostic products across a range of sectors including clinical, veterinary, agricultural and environmental markets. We are GMP compliant and accredited with ISO 13485:2016 and ISO 9001:2015 quality standards.

We are looking for an R&D Scientist to support our growing pipeline of lateral flow diagnostic projects. This role is within the R&D team, and involves assisting with taking projects from the point of feasibility through scale up and the transfer into manufacturing. You will be required to be familiar with, and keep up to date with established and emerging technologies in the medical devices/diagnostic industry, in particular relating to Point of Care testing, to ensure our service provision is maintained at the highest standard possible.

Working as part of the R&D team, you will be based at the University of Birmingham within the BioHub facilities, with some occasional visits to other sites as required.

Primary Duties and responsibilities:

- Assisting in the development of lateral flow assays for third party and internal product development.
- Prepare and present data as and when required.
- Providing regular reports on activities for internal use and for external customers.
- Prepare written SOP's for laboratory methods, procedures and instrumentation.
- Assist in the generation of marketing materials, specifically the technical content.
- Ensuring that all relevant procedures are followed, and compliance is at least maintained in line with current versions of ISO:9001 and ISO:13485.
- Other duties as may be reasonably requested by your manager on occasion.

Essential Skills/Competence

- Degree or higher in a scientific subject or equivalent professional experience.
- Understanding of lateral flow assays.
- Attention to detail and good record keeping.
- Flexible approach to working in a relatively new but rapidly expanding organisation.
- The ability to communicate effectively with a wide range of internal and external personnel.
- Hands-On approach, a team player.

Reporting
